Social Business Analyst

Leverage Industry Insights to Make Better Decisions Faster

<p>Content Aggregation</p>	<p>Content Analytics</p>	<p>Content Distribution</p>
<p>Select from various online content sources, or choose from a pre-curated Industry Library.</p>	<p>Analyze and compare any metrics, capture important trends about your business or industry.</p>	<p>Automate your analytics to send real-time alerts, schedule recurring reports.</p>

Learn how the **3DEXPERIENCE** Business Intelligence solution can help you:

<p>Identify business opportunities and risks with access to thousands of curated content sources by industry</p>	<p>Stay connected to customers and partners with customized, filtered feeds and updates</p>
<p>Track brand awareness and competitive activity with a view into the latest content, reactions, sentiment</p>	<p>Access global overview of market activity with trend monitoring and analysis.</p>

Collaborative Business Innovator

Collaborative Business Innovator provides the applications and services to digitally connect employees, suppliers, customers and consumers. It enables your teams to create dashboards and communities, aggregate and share data, and connect people and data in one place to empower collaboration, agility, and faster time to market.

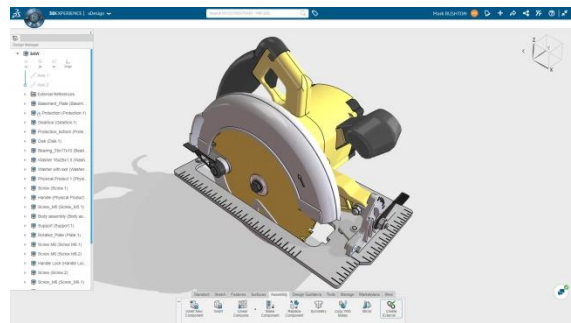

The Most Relevant Information All in One Location:-

Data is the cornerstone of any business. Collaborative Business Innovator allows you to create dashboards to quickly and securely share essential product development data, such as key performance indicators with executives and customers. Easily create your own dashboard to tailor the experience and display the information that is most relevant to your business in one convenient location online. Keep your product development team informed by sharing any type of media, including images, videos and any CAD files.

Collaborate Through Communities:-

Easily create communities to share and collaborate on ideas, topics of interest and projects. Share information with stakeholders in real time just as you would on any social platform. Post updates and requests for feedback, engage with ideas, and view and comment on designs regardless of your location. Create, assign and manage tasks, and monitor their maturity status directly in the community. Enable easy sharing of your engineering files with 3DDrive and share interactive content with 3DPlay.

Intelligently Store Engineering Content:-

Store everything in the cloud with a storage solution that understands design files, and the relationships between other CAD files you upload into the 3DDrive. From within your dashboard, you can easily add, access and share your engineering content as desired. Visualize, annotate, mark-up and comment on various file formats, and share them directly with anyone involved in your project.
